

AERO Letter

January, 2023

Dear Colleagues,

Welcome to the new semester. We at Project AERO send you best wishes continued deep learning for both you and your students. We hope for a semester without too many bumps in the road. We urge you to visit this website and check out the “Guidance” section for valuable resources as you look ahead to the rest of the year.

More than 20 years ago, a small group of educators representing schools from every part of the world met to plan ways to bring the best of standards-based education to American/international schools. From those modest beginnings, Project AERO has grown in both richness and reach, now including the participation of thousands of teachers and administrators working in hundreds of schools.

A highlight of Project AERO has been its annual week-long AERO Summer Institute which, over the years, has provided high-quality, in-depth and content-rich professional enrichment to more than 1500 teachers. It is one of the very few professional learning opportunities that dives deeply into specific content areas.

We are now planning for **this** year’s AERO Summer Institute, which will be **held** at Marymount University in Arlington, Virginia, from Sunday evening, **June 25th** through noon on Friday, **June 30th**, 2022. We will be offering workshops in Math, English/Language Arts, Social Studies, World Languages, Science and Academic Leadership/Curriculum Development. **Detailed information about the AERO Summer Institute and an application form are posted on the AERO website.**

We invite you to consider being part of this outstanding professional learning experience.

With warm collegial wishes,

David Chojnacki
Project Director
