

Lesson Plan 1

Lesson Title: Situation géographique de la France

Unit Title: La Restauration en France

Subject/Topic Area(s): La restauration en France

Grade: Leve

Time Frame: 4 heures

Designed by:

Evelyn Armstrong
Sylvie Lubow

Materials Needed:

carte de France, carte du monde francophone textbook, internet, game tour de France, CD player and CD about regions or DVD documentary about regions, white paper, pencil

Key Words: régions, pays, climat, temps

Standards:

Major Standards— 1.2 a,b,c,e; 3.1b

Supporting Standards— 1.1 b, (end of 8th grade)

Brief Summary of Lesson:

See the influence of location and climate on vegetation , food products and find out what the agricultural activities are in those particulare regions.

Activities:

Show the map of France with the main regions, show French speaking countries in a world map, match particular regions with climate, Example, the Normandy benefits of a moderate climate and enough humidity to provide fertile soils, therefore the region has a rich range of dairy products and other specialties as creamy dishes. Listen to the CD or show a DVD about French regions.

Assignment:

Make an oral presentation using Power Point and visuals about a French region, its climate and gegraphical location . Make sure to tell which products are found in that region.

Identify desired results:

- ❖ **What do they already know that will help them learn new information?**
Students know what weather to expect in the South and that in humid places, you could expect more green vegetation
- ❖ ***Students will understand...***
The influence of climate on vegetation and food products in France, the influence of history on local food specialties
- ❖ ***Students will know...***
How to situate most important regions and locate the most famous towns
- ❖ ***Students will be able to...***
Find their way on a French map
- ❖ **New information/structures/vocabulary acquired**
vocabulary about the weather, geographical notions, sophisticated expressions to situate places

Examples of Student Work:

Each student chooses a region of France or another francophone country and develops its geographical aspects
